

# Quick Pedigree Searches From Your Mobile Device

## pedigree database

The Jersey Canada on-line pedigree database is a popular resource that we provide to give breeders access to **herd book** information.

The data is housed within a sophisticated International Livestock Registry (iLR2) system from the Agricultural Business Research Institute (ABRI), a world leader and supplier of agri-business IT. Each month, thousands of animals are searched through this portal to help with breeding and management decisions, or it is used to locate fellow Jersey breeders.

## mobile application

If you have an iOS or Android device, ABRI also has an application (app) from Internet Solutions for mobile access. The app takes a minute or two to set up and is a great option for **quick searches** to view **pedigree**, **progeny** and **member** information.

If you require more details on each animal, such as production records, show results, and awards, it is best to visit the pedigree database from the Jersey Canada **website**. While the app is great for quick searches when you are 'on-the-go', the portal can offer you a more complete picture - *it just depends what you are looking for*.

## app cost

For a one-time download of \$2.79 (+ tax), information is at your fingertips. Unless you have a WiFi connection, you will be using data in the same fashion as if you were to view pedigree information from the ABRI portal off the Jersey Canada website.

If you don't want to eat up all of your data, it is recommended to turn off cellular data for this application within your settings on your mobile device. This way you can only access the app with WiFi.

## www.jerseycanada.com

option 1:  
ABRI portal

## get started

There are two ways to download the INSolutions app to access the Jersey Canada Pedigree Database:

### Option 1

- Go to the Jersey Canada website and navigate to the Pedigree Database (top right under Quick Links);
- Once you enter the ABRI portal named 'Animal Enquiry', scroll down and click on either the App Store (iOS) or Googleplay (Android) button on the bottom of the screen, which will take you directly to the INSolutions application.

### Option 2

- Search INSolutions directly from the App Store or Googleplay on your device.

search  
members

search  
animals

option 2:  
directly to app

## install

You will know when you have found the INSolutions app when you see the generic image of Angus cattle. Click on the price button (\$2.79) to purchase the app. You may be asked to verify your account information, which you should have handy.

## set-up

Once purchased, it's time to set-up your app. You only have to do this once.

- ▶ Country: Canada
- ▶ Species: Dairy
- ▶ Database: Jersey Canada
- ▶ Check 'Advanced Animal Search'
- ▶ Continue

## search

- Search for Jersey Canada members by selecting 'Member Lookup';
- Search for registered and recorded animals through 'Animal Lookup'.

- Several drop-down options are available to provide you with information on each animal.
- Partial spelling will be searched, however if names are misspelled your search may not be successful.
